PROJECT

1- (2016) SECURITY RISKS TO SOCIAL APPLICATIONS : Organisation Social networking applications (Facebook, Whatsapp, Twitter, Instagram) have been explained, pros and cons have been mentioned, security risks and hackers have been explained on these applications with clarification of the correct methods of use.

2- Home2 (Underway)A phone application named Home 2 is concerned with university housing, it is based on providing services to students in terms of access to housing and its services and providing better communication with them, as students find it difficult to find suitable housing for them, and this application helps them in that.
