Projects

Halls Reservation System

3/2020 - 6/2020

My Graduation Project:

There are two android applications, the first one for admin and the second for user.

Admin's application talking about general information like his name, phone number, hall name, hall location, and the services like cars and sweets...

User's application talking about how the user will reserve the room based on admin's data like halls and room available...

Interests

Flutter cross-platform is coming soon.

Languages

Arabic: Native language

English: Good in writing, reading and conversation.
