Cyber Polygon 2024

MENA ISC 2024

September 10–11, Riyadh

Online + offline

What is Cyber Polygon

An international cybersecurity training
aimed at increasing global cyber resilience

In 2024, Cyber Polygon will include an online training
on practical cybersecurity for corporate teams from all
over the world.

This year, Cyber Polygon is a partner of MENA ISC
and will take place together with the conference
on September 10–11.

The initiative will be presented at the Cyber Polygon
booth during MENA ISC. There, the training results will
also be displayed

Cyber Polygon 2024 is organized by BI.ZONE
in partnership with Salam

Strategic goals

- Develop the teams' skills in repelling cyberattacks

- Expand the practical knowledge of technical specialists

- Engage the management of international organizations and corporations in the cybersecurity dialog

- Raise digital literacy among the population

The main goal is to strengthen cybersecurity at all levels

Technical training for corporate teams

Scenario

Investigation of a sophisticated targeted attack
on a technological organization

Participants

Cybersecurity teams from private companies, state agencies,
universities, non-profit and international organizations

Team members

The training is recommended for specialists
interested in incident response, penetration testing,
blue teaming, and for cybersecurity students

1—10 members in a team

Legend

A targeted attack on a tech company

A company, *ClosedML*, released an innovative application based on a machine learning technology. However, shortly after the release the data model in the application started to degrade. The reason could not be determined straightaway.

At the same time, one of the competitors announced their release of a similar solution. At the presentation, the competitors revealed a few product details — many of the features were suspiciously identical to the *ClosedML*'s solution.

The company specialists believe, degradation of their machine learning model and the competitors' actions are interconnected.

ClosedML have addressed a cybersecurity team to investigate the incident.

Format

The teams will investigate an incident by applying classical digital forensics and threat hunting techniques

Duration

- 24 hours

The training results will be summarized on the second MENA ISC conference day.

Participants will receive a certificate of training completion

Facilities and support

Platform

The training will run on BI.ZONE Cyber Polygon Platform.

After the event, the tasks will become available to Platform subscribers

Organizing team

BI.ZONE experts prepare the scenarios for the training, provide the infrastructure and support the participants during the event

At the conference the guests will:

- Watch the training in real time. A scoreboard will be available for them at the Cyber Polygon booth

- Solve test tasks on BI.ZONE Cyber Polygon Platform

- Delve into the atmosphere of a technological SOC in VR format

- Test themselves for ability to resist cyber fraud

- Learn about cybercriminal groups, active in the Gulf countries

- Adopt new skills from BI.ZONE experts in detection and countering cyberthreats during workshops and sessions of MENA ISC

The previous Cyber Polygon combined an online conference and a technical training for corporate teams

7 million viewers from 78 countries watched the conference

Among the speakers:

- Mikhail Mishustin, Prime Minister of the Russian Federation
- The Rt. Hon. Tony Blair, Prime Minister, Great Britain and Northern Ireland (1997–2007)
- Professor Klaus Schwab, Founder and Executive Chairman, World Economic Forum
- Steve Wozniak, Co-founder, Apple Computer
- Henrietta H. Fore, Executive Director, UNICEF
- Senior officials from Visa, Mastercard, EY, IBM, Microsoft, Ericsson, Trend Micro, Check Point, Kaspersky, and other global corporations

Jürgen Stock
Secretary General, INTERPOL

Peter Maurer
President, International Committee of the Red Cross (2012–2022)

A live session with the International Space Station to commemorate the 60th anniversary of the first manned flight to space.

Russian cosmonauts discussed data protection and prospects for international cooperation in the space industry
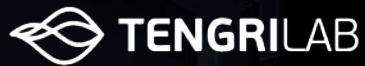

200 corporate teams from 48 countries joined the last technical training
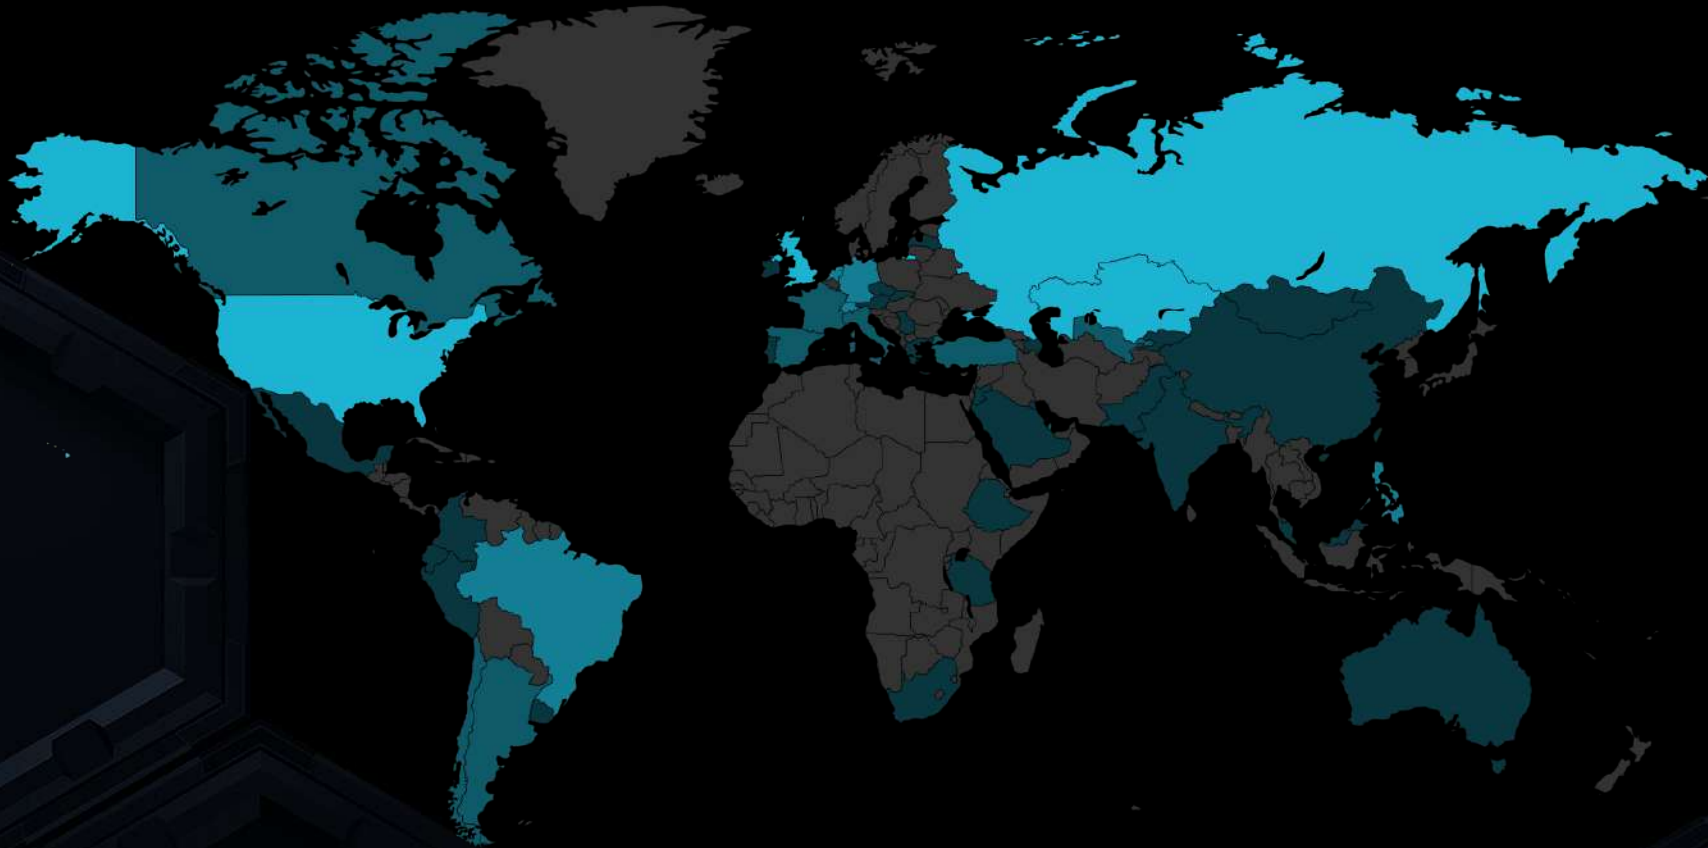

1,000+
applications received

20+ countries
with regular users of BI.ZONE Cyber Polygon Platform in 2023

0   3   5   10   10

Among Cyber Polygon training participants

100+ organizations from 30 countries
have already joined the upcoming training
