Cyber Warriors Competition for Universities (FTC)2025
مسابقة "محاربو السايبر" للجامعات 2025

What is a CTF Competition:

Capture The Flag or CTF competitions are a set of computer security puzzles, or challenges,

involving reverse-engineering, memory corruption, cryptography, web technologies, and more .

About our CTF Cyber Warriors Competition:
The National Cyber Security Center (NCSC) aims to empower students who are passionate about cyber security and give them the chance to improve their skills, learn new techniques and be more confident about their knowledge to pursue a career in cyber security. Therefore, this competition is designed to challenge the students and brings out the best in them when it comes to solving and figuring out difficult and unusual computer security challenges .
And of course, at the beginning of 2023 the NCSC has launched a series of free training courses in cyber security to prepare the students who are willing to participate in the upcoming CTF for the challenges, or the students who simply would like to improve their skills in cyber security.

Why should you sponsor the Cyber Warriors CTF competition for universities :

1. You will empower the generation that will be creating a better future for our communities
2. You will be part of bringing up cyber security experts that will play a major role in protecting the cyber space of our beloved Jordan
3. You will be giving the chance to students who are about to graduate to be headhunted by well known cyber security companies and get hired .
4. If you are a cyber security company or you have a cyber security team, you will be able to find the best talents to be potential candidates to join your company .
5. Last but not least, you will be part of the cyber security ecosystem that we are trying to build and will be happy to have you with us.
