

# Facilities Management Conference 2026

The Role of AI in Facilities Management  
15 April 2026 – The Ritz-Carlton Hotel, Amman

# Overview

The Facilities Management Conference 2026 brings together leaders, professionals, and innovators to explore how Artificial Intelligence is reshaping the future of facilities operations.

This one-day conference highlights real-world solutions, industry breakthroughs, and practical applications that deliver efficiency, sustainability, and superior service outcomes.

# Conference Theme

“The Role of AI in Facilities Management”.

The conference focuses on the changing landscape of facilities management as AI-driven technologies become central to asset management, predictive maintenance, smart building models, sustainability analytics, and workforce optimization.

# Target Audience

- Facilities Managers & Directors.
- Quality, Risk Managers and Supply Chain Managers.
- Real Estate Developers.
- Property & Asset Management Companies.
- Government & Municipal Facility Operators.
- Technology & AI Providers.
- Security & Smart Building System Integrators.
- Sustainability Officers & Energy Consultants.
- FM Service Providers.
- HSE Professionals.
- Academics & Researchers.
- Engineers.
- Investors & Corporate Decision Makers.
- Expected attendance: 250–350 participants.

# Key Components of the Event

- Public sessions to introduce the sector and the importance of using artificial intelligence.
- Presentation sessions for the most important companies and technologies in the sector.
- Discussion sessions on the most important practices and how to implement them in the sector.
- Discussion sessions with some representatives of the government sector to work on finding solutions to accelerate the activation of the use of digital automation in the sector.
- A hall dedicated to communication and face-to-face meetings for knowledge exchange.
- Presentations of global best practices in the sector.

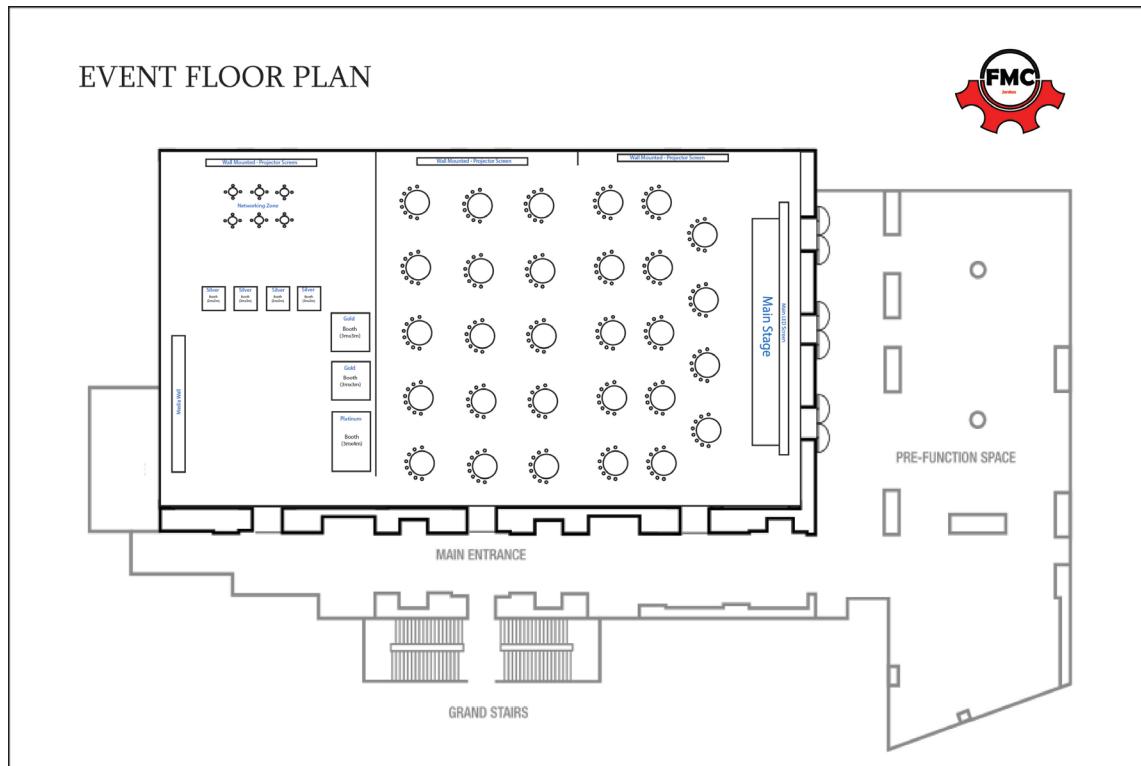

# Why Attend?
